## 美国专业霓虹产品

世界最大的灯管、电极、加工设备及稀有气体之霓虹-照明材料生产商  
World's Largest Producer of Electrodes, Rare Gases, Fluorescent Tubing, and Equipment for the Neon and Lighting Industry

自1927年起, EGL已开始了制造霓虹灯配件的事业, 在1976年EGL已成为世界最大的霓虹产品生产商, 供应全球50%以上霓虹及招牌工业所需的电极、灯管、气体、灯圈及其他零配件。

公司拥有一系列的加工设备, 生产加工交叉头、排叉头、垂直变压器、真空泵等一切霓虹灯厂所需的设备。此外, 还提供一系列的霓虹灯原料、标准管槽座及高质量出光灯管。

时至今日, EGL仍由哥拜恩家庭所拥有和管理。现在已遍布西卡。全球有45个国家通过10000家招牌公司及企业选择在制造招牌和霓虹灯管时制定使用EGL的产品及设备。

为了达到这些要求, EGL开设的46000平方尺厂房购置了高度专业性而快速性的生产设备, 以提升品质并扩大生产量, 并不断为行业更新提供更高快更便广泛的霓虹产品, EGL绝对称得上是霓虹行业的领导者。

Since 1927, EGL began the business of neon parts production and by 1976, EGL had become the world's largest manufacturer of neon products, with more than 50 percent of all neon signage worldwide containing EGL electrodes, tubing, gases, tube supports, or other components.

100%  
Made in USA  
100%美国制造

The company's line of processing equipment also expanded to include crossfiles, torches, ribbon burners, bombardier transformers, chokes, diffusion pumps, vacuum pumps, and a wide variety of other equipment virtually everything needed to build a complete neon plant. In addition, EGL developed a comprehensive line of cold cathode lamp blanks and housings, as well as high-output fluorescent lamps.

Today, EGL is still owned and operated by the Conese family, now in its fourth generation. Over 10,000 sign shops and corporate managers in 45 countries now specify EGL products and equipment for their signage and architectural lighting.

To meet the demand, EGL operates an 80,000 sq. ft. manufacturing facility with highly-specialized, state-of-the-art equipment, rising quality to new heights and increasing production capacity while continuing to develop the world's most comprehensive, most advanced line of neon products.

# EGL之精彩演绎

**EGL** 运用先进技术和丰富经验，采用专利的原料生产高品质的霓虹灯管，您的广告商、雕塑师及建筑师期望如此：结构匀称且长寿，EGL has introduced more new colors in the last 15 years than any other source - stunning, saturated colors that give your neon signage, channel letters, and architectural lighting unequalled brilliance, uniformity, and longevity.

**EGL** 独有的荧光涂层超强的附着力，消除了涂层剥落、褪色及于弯曲和焊接变形的情况。

EGL's proprietary phosphor coatings dramatically boost adhesion, uniformity, brightness and long term color stability ensure unmatched brightness and stability without flaking, wear/tear, ripples, specks, or darkening at the bends (even with shades of blue).

**EGL Mer Plus™ Electrodes 加汞电极**  
SAFE - so more filling mercury

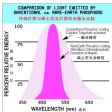

**EGL Advantage™ Electrodes 电极**

EGL 生产符合75国际标准及定制的电极，以满足您不同规格的需要，所有工序均为封闭式生产，品质严格，确保产品可靠、安全和长寿。

The world's broadest line... to satisfy your most specialized requirements without compromise. EGL manufactures over 75 standard and custom electrodes in stock under strict quality control that ensures your neon the ultimate in brightness, clarity, and longevity.

19CL (200mA)

新一代霓虹管/冷极管 - 磷土荧光霓虹管  
NEW - THE RED EARTH COATING GLASS TUBE

**C.L. Designer®** 系列, 是EGL采用三种不同荧光粉(三基色)所调配制成的灯管, 比传统的霓虹管的亮度高达二倍, 使霓虹字及图形更清晰光亮, 颜色更鲜艳, 故更受欢迎。

Up to 300% brighter than conventional neon, plus greater output stability and stain resistance. For channel letters and signage requiring super-bright whites and brilliant colors, specify the C.L. Designer® series. This next generation of neon tubing blends three rare-earth phosphors enabling the brightest output possible, and ensuring color accuracy for corporate color schemes.

左图标准霓虹灯管, 使用 C.L. Designer® 磷土荧光粉 (三基色) 所调配制成的灯管

右图新一代霓虹管, 使用磷土荧光粉 (三基色) 所调配制成的灯管

Using colored rare-earth tubing (phosphor-coated) plastic fascias produces signage that is not only brighter but more vivid and pure than signage illuminated with conventional white tubing. Compare identical blue plastic fascias illuminated by conventional white tubing (left) and EGL C.L. Designer® (right).

EGL 之所有产品均为 100% 美国制造, 品质最佳, 请认准EGL, 您更有保障!
